

A 3D rendering of a warehouse conveyor belt system. Several cardboard boxes are positioned on the belt, which is flanked by blue guides. Red laser lines are projected across the floor and the boxes, creating a grid pattern. The scene is brightly lit, with a strong light source from above creating a bright glow in the center of the conveyor.

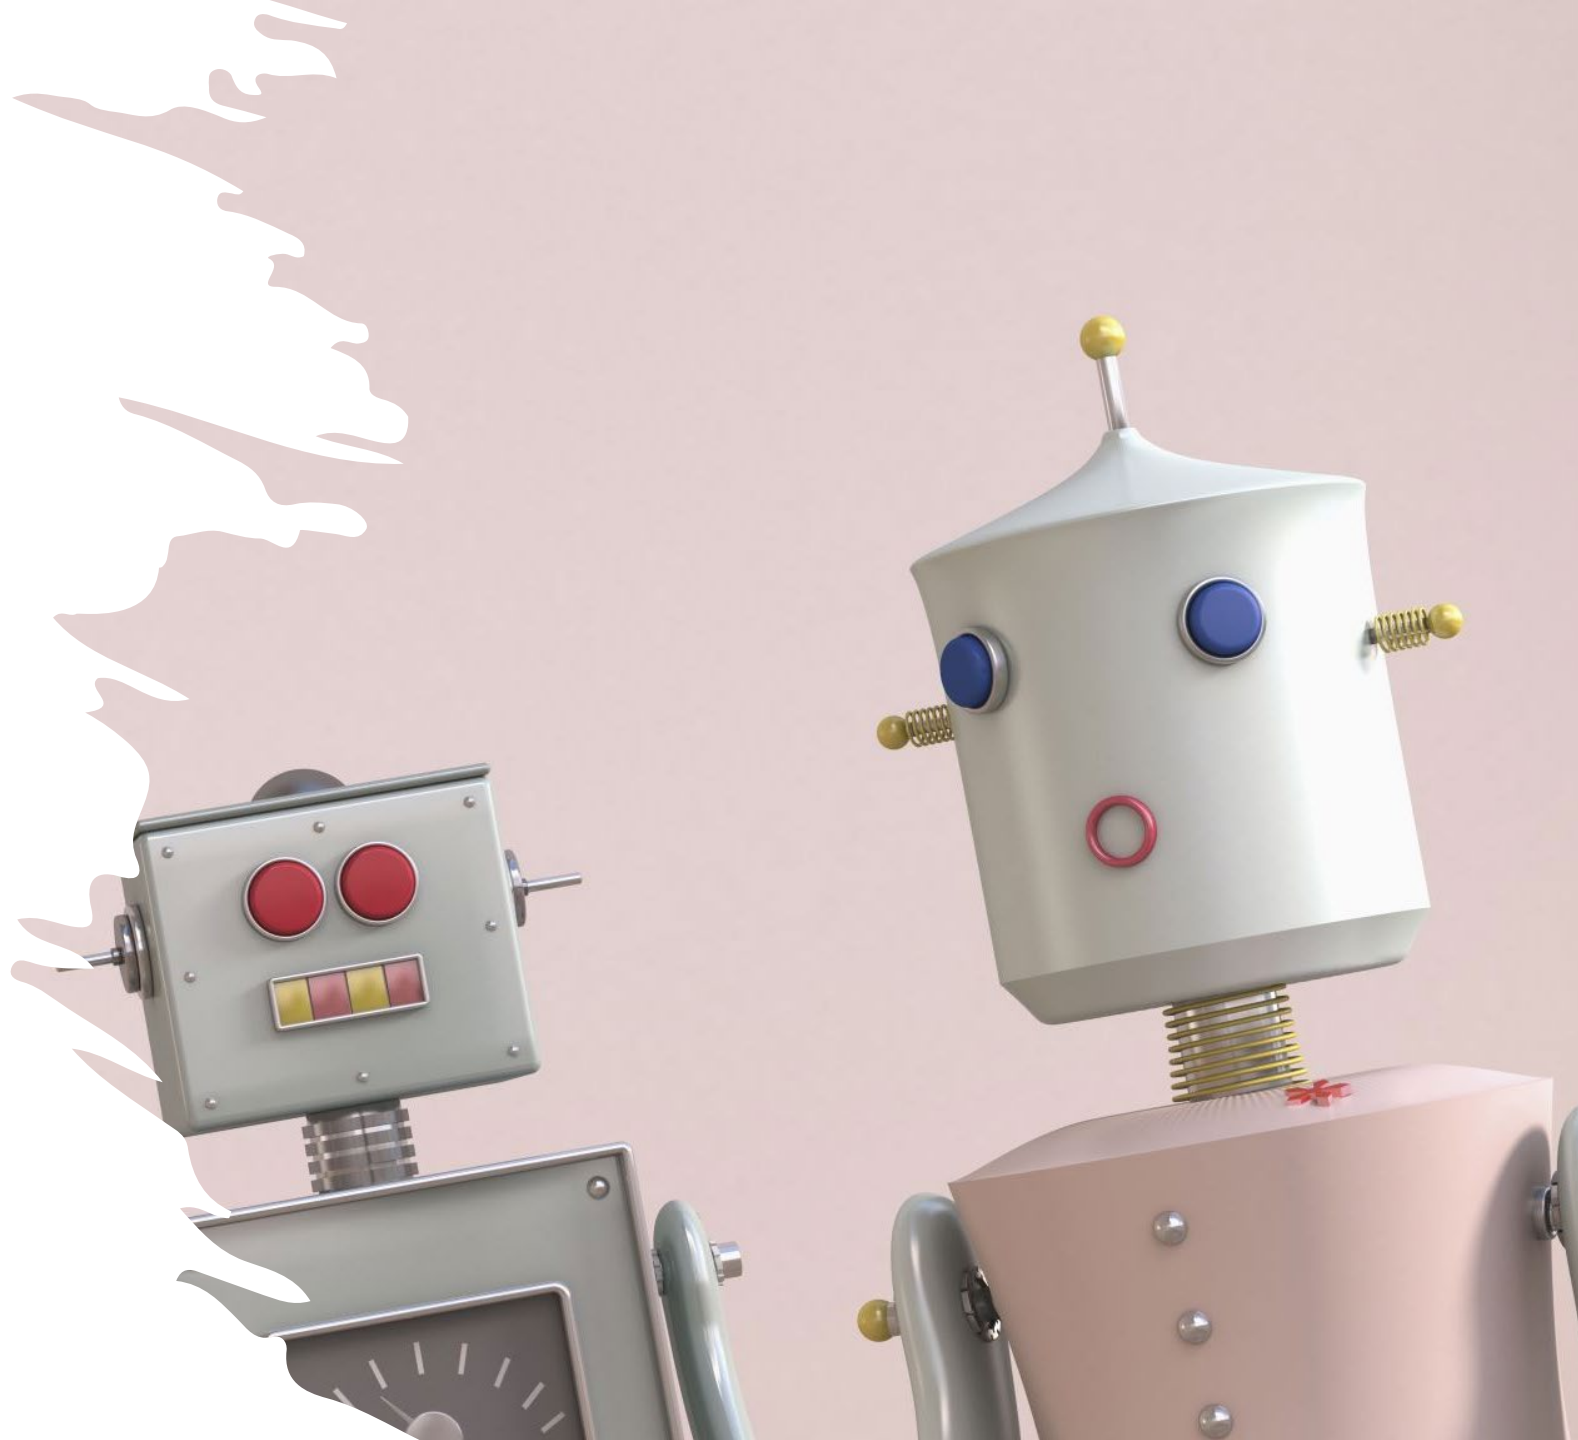

# Hyper automation

IF YOU HATE EVERYTHING,  
AUTOMATE EVERYTHING

# Hyperautomation

## Hyperautomation

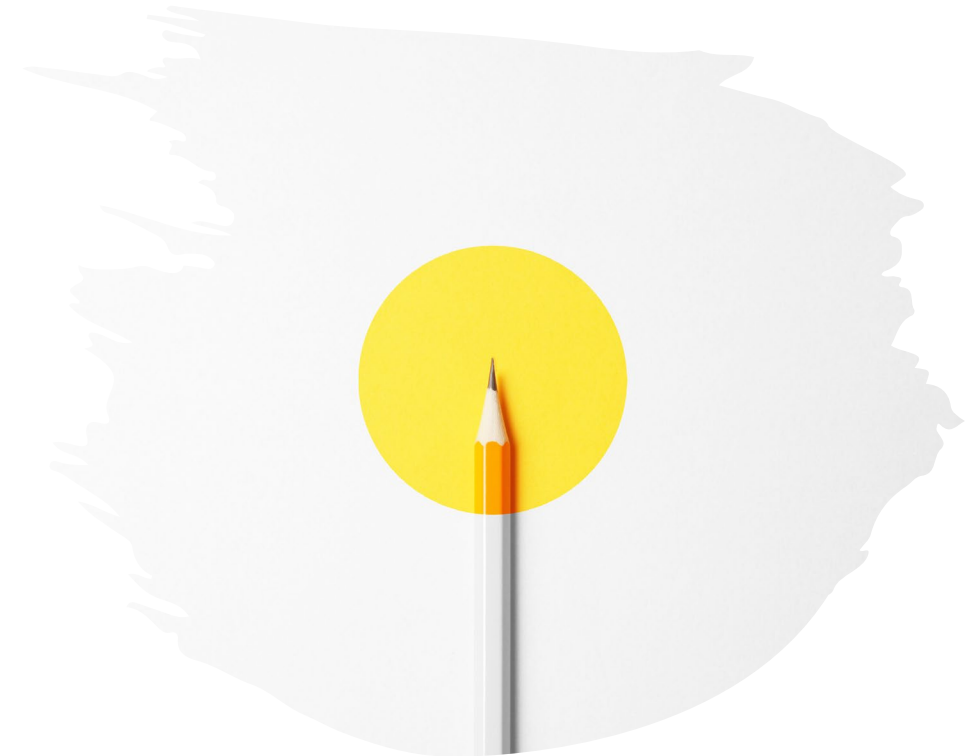

- Hyperautomation brings together several components of process automation, *integrating tools and technologies that amplify the ability to automate work.*

# Automation hub

[Automation Hub](#) | [Automation Hub Overview](#) | [Automation Store](#)

- Literally UiPath LinkedIn
- A collaborative space for sharing automation ideas as well as checking for progress on projects of interest
- It is meant to accelerate the adoption of RPA across an organization by creating a Community of Interest for RPA, thus putting employees in the drivers' seat of automation initiatives.
- Automation Store in Automation Hub allows business users to browse and search for ready-made automation that can be downloaded and used.

# Task Capture

## [Task Capture](#)

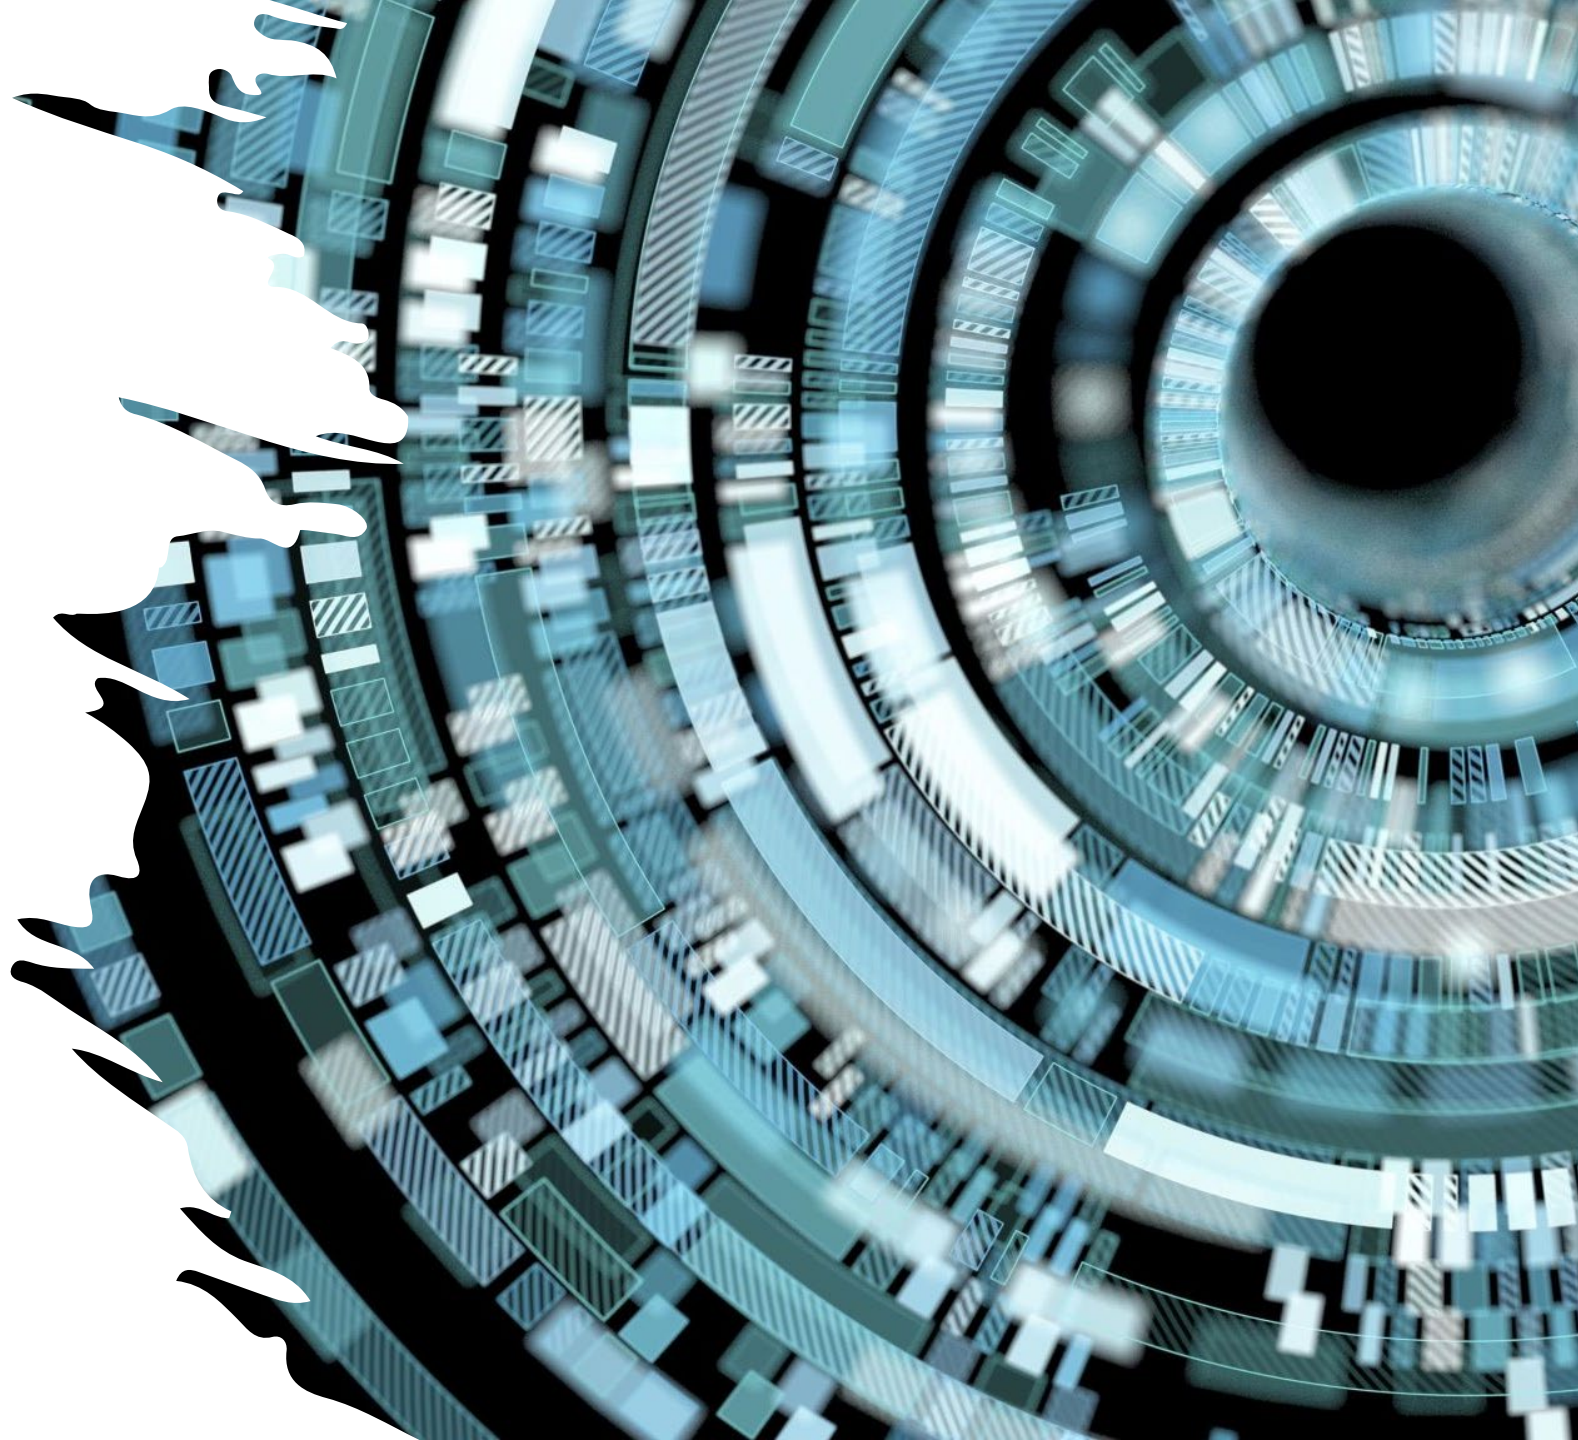

- UiPath Task Capture is a process discovery tool that helps you get detailed insights about automation candidates directly from your employees.
- You can use Task Capture to capture each step that you perform in a process in the form of screenshots and collect smart data about process statistics.
- Based on this captured data, Task Capture creates a detailed Process Definition Document or PDD, which is a Word document describing the process and its XAML that can be easily exported to Automation Hub.

# Process Mining

## Process Mining

- UiPath Process Mining is a process mining solution that transforms data from your IT systems into visual interactive dashboards, allowing you to see existing value decreases, bottlenecks, and discrepancies, as well as understanding the root-causes and possible risks.
- It offers real-time, valuable insights to improve business processes over time.

# *Questions?*

COMMENTS? CONCERNS? VIOLENT  
REACTIONS?

A hand holding a magnifying glass over a city street at night, with a white silhouette of a person's head and shoulders in the foreground.

# Discussion Questions

- What is hyperautomation?
- What is the automation hub?
- What is the difference between task capture and process mining?
